Overview

No doubt about it…HIPAA has grown teeth. Within the last year, a small provider group settled a $150,000 resolution agreement with the Office for Civil Rights for potential HIPAA violations. But what can you do to avoid the same scrutiny? The first step is to dispel the myth that cyber risk is a technology problem. Most breaches are caused by people processes and behaviors, which is why protecting health information begins with leadership and ends with solid risk management practices. Content in this webinar is appropriate for all senior living communities.

Learning Objectives

By the completion of the presentation, attendees will:
• Identify about the importance and impact of cyber risk;
• Discuss a high level overview of HIPAA security and the top five causes of breach; and
• Create a beginning plan for organizational readiness to minimize impact.

Who Should Attend

Beginning to intermediate-level learning geared toward organizational leadership, compliance and risk managers, and technology managers. CEOs, Administrators, Technology Managers, Compliance and Risk Managers, and Human Resources Personnel.
