

Wound Wisdom for the Post-Acute Care Settings

October 26, 2022

Northcrest Community Training Center
2300 Northcrest Parkway, Ames, IA 50010

Program Description

Attend this **basic to intermediate** level program to update your wound prevention and management knowledge. This seminar will discuss pressure injury risk factors, prevention strategies, and other hard-to-heal wound etiologies such as arterial and venous insufficiency, diabetic foot ulcers, pressure injury imposters, and more. Content includes best practice recommendations for wound assessments, documentation, and reporting mandates from the Centers for Medicare and Medicaid Services. This course will include hands-on skills labs that review multiple assessment and treatment interventions such as wound recognition and assessment criteria, collagenase indications and current evidence-based treatment interventions. This program is appropriate for new and seasoned treatment nurses, facility, or corporate wound management leadership, MDS Coordinators, and others involved in wound prevention and management.

- Identify patient/resident risk factors beyond the Braden, that may lead to pressure injury development.
- Recognize assessment, documentation, and reporting parameters that meet best clinical practices and CMS guidelines.
- Classify common wound etiologies leading to chronic, hard-to-heal wounds.
- Describe treatment interventions that best meet clinical practice and regulatory guidelines.
- Explain the concepts of hygiene and wound infection management, including how to culture.
- Participate in skills labs that reinforce the course content.

Content Includes:

- Pressure Ulcer/Injury prevention strategies.
- Other most frequently encountered wound etiologies.
- Coding mandates and common issues related to MDS reporting in Section M.
- Pressure Injury Imposters.
- The Unavoidable Pressure Injury/Kennedy Terminal Ulcer/Skin Failure.
- Evidence-based treatment interventions for hard-to-heal wounds.
